

Intro to markdown

Github: <https://github.com/ashish-mw/workshop-markdown>

What is markdown?

- A light-weight markup language.
- Focus on content rather than syntax.
- Popular among software projects for writing READMEs and other documentation.

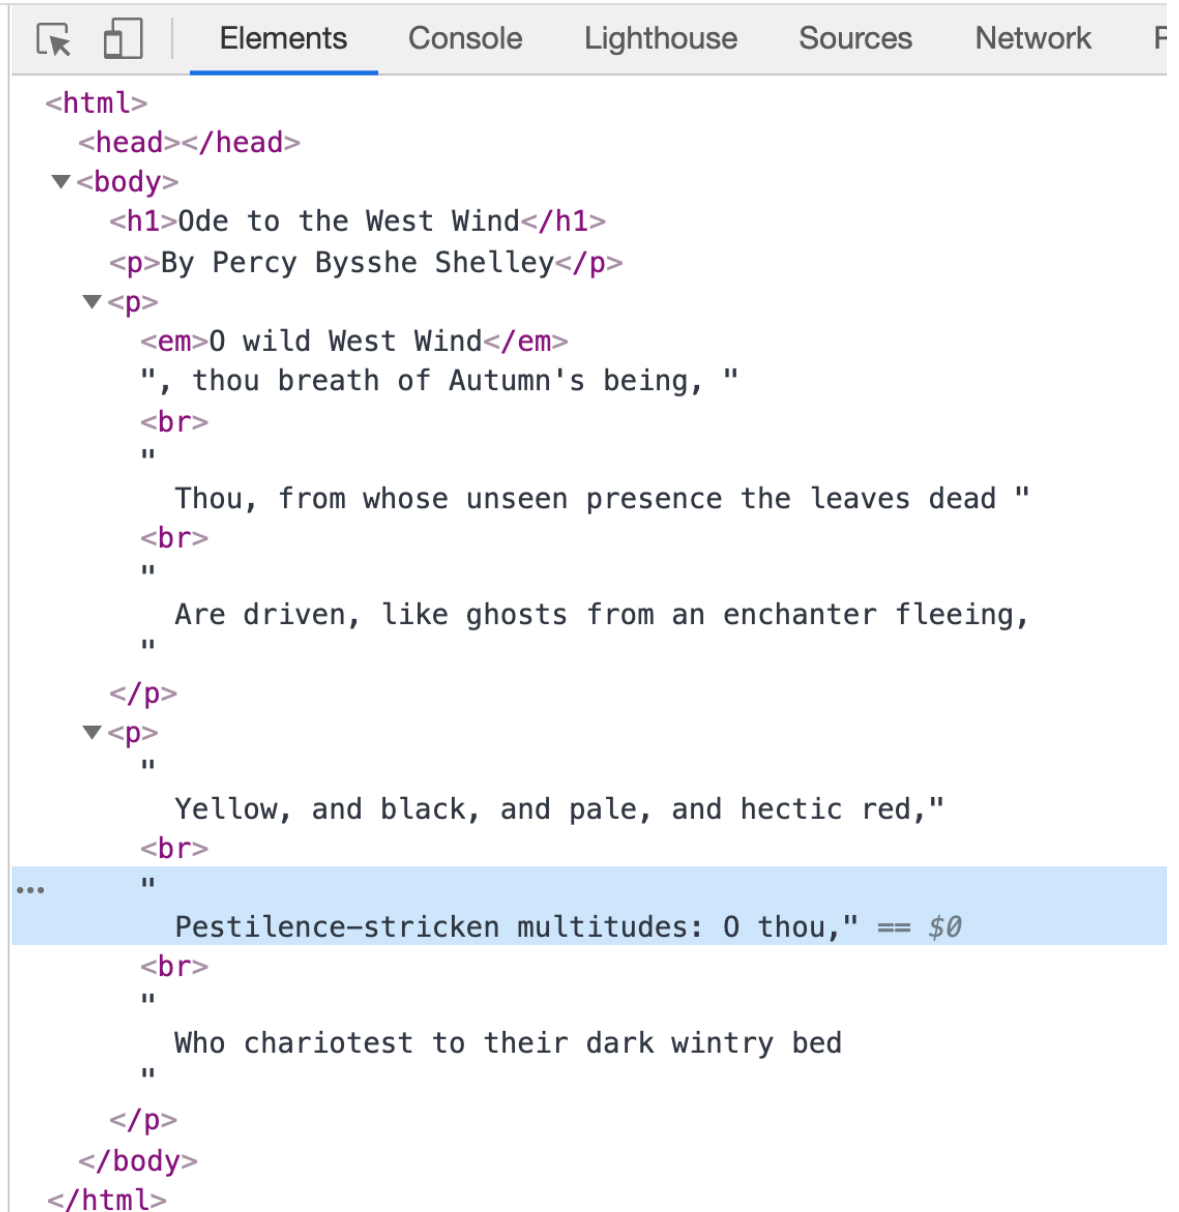

Markup?

Ode to the West Wind

By Percy Bysshe Shelley

O wild West Wind, thou breath of Autumn's being,
Thou, from whose unseen presence the leaves dead
Are driven, like ghosts from an enchanter fleeing,

Yellow, and black, and pale, and hectic red,
Pestilence-stricken multitudes: O thou,
Who chariotest to their dark wintry bed

```
<html>
  <head></head>
  <body>
    <h1>Ode to the West Wind</h1>
    <p>By Percy Bysshe Shelley</p>
    <p>
      <em>O wild West Wind</em>
      ", thou breath of Autumn's being, "
      <br>
      "
      Thou, from whose unseen presence the leaves dead "
      <br>
      "
      Are driven, like ghosts from an enchanter fleeing,
      "
    </p>
    <p>
      "
      Yellow, and black, and pale, and hectic red,"
      <br>
      ... "
      Pestilence-stricken multitudes: O thou," == $0
      <br>
      "
      Who chariotest to their dark wintry bed
      "
    </p>
  </body>
</html>
```

A web-browser renders **HTML** into **rich text**.

Benefits of writing in markdown

- Conversion to other document formats.
- Focus more on content.
- Plain-text.
- Code repo hosts (GitHub and GitLab) usually render files with extension `.md`.
